# **Film and Video Production**

### Award Type: Associate in Science

The Film and Video program prepares students for a wide variety of positions in the motion picture broadcast industries. Students write, produce and edit narrative and documentary projects in a series of courses designed to bring students from beginning through intermediate production and post-production technique. All courses provide students access to the latest in digital production and post-production technology. In addition, students learn to critically interpret motion pictures through a series of courses in film history and aesthetics.

#### The graduate of the Associate in Science in Film and Video Production will:

- Utilize camera, sound, editing and lighting equipment in a professional capacity.
- Write compelling narrative stories in proper screenplay format and structure.
- Apply analysis and critical evaluation to cinematic works through discourse and writing.
